

## What to expect in November - Day one of conference!

International speakers from around the globe looking at more accessible healthcare in Acute, Aged and Community care environments:

Consumer stories from persons of Size and those with limited mobility. Direct consultation with those on the other end of receiving care.

How these journeys can be improved through expert panel discussion facilitating Q&A from the attendees.

Preserving Dignity through strong equipment, culture, and experience choices.

Take a large city hospital's journey in the development of their patient risk management approach in an ever-changing environment.

### ***Take a workshop:***

Risky Business- a critical review on various risk management & investigative tools currently utilized across the States.

Hearing how story telling has influenced safe patient handling in the USA.

See how an AI app can make the right sling selection, and what new discussions surround the in-situ sling and pressure avoidance.

Navigating community care around discharge choices presenting barriers and what controls will work.

Have practical hands-on experience with our equipment leaders in the field and have your say in what you think is the innovation of the year.

Then take the opportunity to network with all your fellow colleagues on an amazing evening at the **South Bank Rydges Hotel**. All part of your registration fee.

## What to expect in November - Day two of conference!

***Start the morning with a delicious barista coffee sponsored by the AAMHP executive.***

Get an insight into Aged Care leadership, improve safety, drive staff retention and lower the costs.

Hear how to engage and harness the workforce in promoting safe mobility in Acute care environments.

Take a journey in how New Zealand uses Virtual reality to enhance education.

Getting to your Emerald City: By ensuring accountability and sustainability in your patient handling and mobility programs.

Hear from the “shaping tomorrow” panel listening to yesterdays and tomorrows journeys to come – listen to those who where there in the beginning and can say how it was, to what the new leaders will need to do to lead us ever forward. Do you think we are there yet!

Take a deep dive into falls management on how to prevent patient and carer injuries through reviewing equipment options and challenge some of the old myths around low-low options.

Look beyond “how to lift” strategies and concentrate on worker wellbeing

Decide what’s our focus – Should we be promoting equipment use over manual methods to manage an increasing plus sized patient cohort

### **Take a Workshop:**

Practical advice in finding the balance between falls prevention and patient mobility.

Participate in an objective evaluation of three devices used to roll a patient.

End the day in a casual environment over a drink and nibbles to discuss the future of AAMHP and what you would like to see next time.
